

Tempered glass full height turnstile

ZOJE-Z2005® tempered glass full height turnstile is a product with a more modern design while ensuring the safety level. It is a design that is not currently available on the market. Compared with the traditional full height, its cabinet is composed of stainless steel and tempered glass. It can prevent contact and transfer inside and outside the safety zone. Also has all the features of full height.

Tempered glass full height turnstile

ZOJE-Z2005® Tempered glass full height turnstile

Full height turnstiles operate like a revolving door. The only difference is that it allows only one person at a time to get accessed by automatic locking after one entry is finished.

ZOJE-Z2005 tempered glass full height turnstile can choose single channel or dual channel according to your project needs. It is constructed from 304 stainless steel and tempered glass, can prevent contact and transfer inside and outside the safety zone. According to your practical requirement, each lane can be easily configured as one-way or bi-directional passage.

It can be integrated with any kind of access controller system (e.g.: RFID device, Push button, Fingerprint and Biometric device).

We are also professional customizers as your idea or project. Contact with our sales to get a professional and suitable solution for you.

Product Parameter (Specification)

	Standard	Optional
Turnstile Type	Tempered glass full height turnstile gate	Dual channel
Dimension	1200*1300*2230mm (L*W*H)	Customized
Material	304 Stainless Steel, tempered glass	316 Stainless Steel
Channel Width	600mm	Customized
Drive Type	Brushless motor	Automatic (Brush/Brushless/Servo motor)
Direction	Single / Bidirectional	-
Power Supply	AC110-230, 50/60Hz	-
Operation Voltage	DC24V, 3A	-
Unlock time	0.2S	-

Function	Fail safe, Anti-trailing	-
Working environment	Indoor & outdoor	-
Working Temperature	-70 C -15 C	-
Relative Humidity	Less Than 95%, No Condensation	-
Pass Speed	35/Minute	-
Input Interface	Dry contact/Relay Signal	-
Communication Interface	RS485/TCP/IP	-
LED Indicator	Yes	-
Emergency	Open Automatic	-
Access Control	Can be integrated with any kind of access control system.	-

Product Feature And Application

ZOJE-Z2005 Tempered glass full height turnstile

- Unique technology: Fully automatic (Brushless/servo motor) is optional for smoother, quieter operation and longer service life
- The material is made of industrial grade stainless steel 304 or 316 and tempered glass, which is durable and can be installed in harsh environments
- Its anti-tailgating function is relatively high and can achieve unattended management.
- Equipment With Traffic Indicator
- Equipment With Automatic Protection, Automatic Reset
- Unified standard external electrical interface, which can be connected with various reading and writing devices (ID Card / IC Card / EMcard / Fingerprint Face Recognition / QR Code / ESD system)
- ZOJE tempered glass full height turnstile widely used in places with high security levels, and can be easily integrated with your existing control software.
